

NIR Italia 2022

7-9 June 2022

beyond spectral range

For the first time in the history of SISNIR, the biennial National Symposium (a reference event in Italy for all professionals working with NIR spectroscopy) will be held in the halls of InnoRenew CoE (Izola, Slovenia).

The 9th National Symposium will bring together important players from the world of research and industry and allow them to socialize thanks to events designed to create productive networks of collaboration:

- Welcome reception with life music (7 June, a day before conference)
- Gala dinner at a restaurant with a beautiful view of the Trieste gulf (8 June)
- Visit the Škocjan Caves, listed on the UNESCO World (10 June, a day after the conference)

A day before the Symposium (7 June) theoretical and hands-on pre-courses will be offered to participants.

The keynotes for the Symposium will be Jean-Michel Roger, Krzysztof B Bec, and Justyna Grabska.

For more information, visit <https://niritalia2022.sisnir.org/>

Finally, on the occasion of the Symposium, the SISNIR General Assembly will take place, where members will elect the Executive Board and the President.

You can't miss it, we are waiting for you!
